Course Description:

SAP SCM stands for Supply Chain Management and it is one of the important modules in SAP. Our Supply chain management (SCM) course covers the areas of production planning (PP), business forecasting and demand planning. Also, you will learn How SAP SCM controls product flow and information flow across the organizations. Unlike any other SAP Course, it clubs the knowledge of multiple modules together,

Supply chain Management is integrated with other business process such as product discovery, development process, material purchase process and production planning process. Supply chain enables the maximum customer satisfaction with less costs to the organizations.

This SAP SCM course is intended for:

- SAP consultants
- SAP production planners
- Procurement Managers
- Supply relationship experts
- Sales/purchase professionals
- SAP End Users,
- Anyone who want to start a career in SAP SCM or want to expand his knowledge in SAP SCM area.
