SAP ISU EDM Training Curriculum

STRUCTURE

SAP ISU EDM Training Curriculum

"Master the SAP ISU EDM fundamentals and start a never-ending career in the SAP space right away with us!"

Course Objectives:

- Learn to use the Energy Data Management component within IS- U/CCS.
- Learn managing profiles in SAP EDM, integrating profile management in IS-U/CCS – The structure of the EDM database system, and the EDM interfaces.
- Learn to manage profile data using SAP Energy Data Management Training.
- Prepare for the related global certification exam and make yourself industry-ready

Course Description:

SAP EDM Training is a special module part of SAP Utilities Industry Solution to manage the energy data of a utility company such as load shapes and standard load profiles. Based on this data we can make Real Time Pricing and Settlement. Profiles are prepared in SAP IS-U-EDM and transferred to SAP IS-U billing via an internal interface. This allows you to bill new types of contracts.

Our SAP Energy Data Management Training is coordinated by best industry experts and the SAP Energy Data Management tutorial is prepared with best industry updates for offering participants best professional insight over modules. The training is available for individual and corporate batches. To know more about this online SAP training course contact reach at help desk of Croma Campus today.

All the best for a new beginning and successful career ahead!
